

NuVerus Skin Care System

Ancient civilizations were known for their wisdom and their ability to unlock nature's secrets. They understood the intrinsic power of natural healers like Black Seed and Curcumin. At NuVerus, we have rediscovered the wisdom of the ancients and combined it with modern science in order to unlock the secret to beautiful skin. The NuVerus Skin Care System is a total approach to beautiful and luxurious skin.

Why SuperFoods

NuVerus unique SuperFoods provide a new level of antioxidant protection for the skin cells. These unique SuperFood antioxidants not only protect your skin, they help repair damaged skin cells to rejuvenate and restore a healthy glow.

Black seed was been used by Cleopatra and Queen Nefertete in ancient times for restoring and maintaining beauty. The essential oil of black seed provides cleansing and purifying qualities, while the EFA content makes it a wonderful moisturiser for the skin. Black seed supports cell renewal, connective tissues are strengthened, blood supply to the skin is stimulated and the skin is revitalised. Skin research confirms that Black Seed Oil helps skin resist the ageing process as well as stimulate repair at the cellular level.

Curcumin, the key nutrient in Turmeric, delivers unparalleled antioxidant protection and repair for the skin cells. Blue Ginger PFA is another powerful anti-oxidant SuperFood to provide added protection and repair for the skin.

A Total Approach to Beautiful Skin:

Wake:

- Cleanser to clean and refresh skin to start the day Start your Day
- Moisturizer SPF after cleansing to hydrate and protect during your day or Bright to restore a bright luminous glow and hydrate to start your day
